

THE 2022 WORKPLACE WELLNESS SURVEY

Understand Today's Changing Workplace

Workplaces have changed dramatically after the onset of the pandemic, and so are the benefits being offered and considered. Now in its third year, the 2022 Workplace Wellness Survey polls employees about their views on their employer-sponsored benefits and wellness education and offerings.

EBRI and Greenwald Research present the 3rd Annual Workplace Wellness Survey.

With a focus on evolving employee benefit programs in the American workplace, this 2022 survey will examine the availability and employee utilization, engagement and satisfaction levels with:

- Health and wellness benefits
- Voluntary benefits as paid leave, caregiving and mental health resources
- Workplace financial wellness including debt and emergency savings assistance.

The 2022 survey will also feature critical perspectives from LGBTQ employees. The survey will delve into overall worker satisfaction levels, work-life balance and flexible work arrangements, but will include an oversample and special analysis and report on views of LBBTQ workers.

Lift ROI: Leverage Your Involvement

- Educate employers, brokers and advisors, sales reps, employees and policymakers
- Inform improved internal decision-making
- Enhance your company's external-facing materials by incorporating findings

Sponsors Receive:

- Input on **questionnaire**
- Sponsors-only **readout sessions**
- **Raw data** for further analysis
- **Chart deck** of all findings
- Be a thought leader by participating in **conference panels and webinars** – or hosting your own!
- **Publicity** in news coverage, press releases, social media & more
